CS457 Big Data Security

Assignment: Access Control for Distributed Systems

Assignment given on : 24-Mar-2025

Assignment to be shown on: 31-Mar-2025

Part 1. Handwritten Assignment

The hand written assignment will be of at least 4 pages [2 sheet back to back] (excluding figures) of handwritten text on what are Distributed System, Lamport Clocks, and JWT.

=====

Part 2: Access Control using JWT

Implement an access control mechanism for a distributed system using JSON Web Tokens (JWT). Users should be able to authenticate, receive a JWT, and use it to access secured endpoints. Ensure token expiration, validation, and role-based restrictions.
